Subject: Fwd: Down Slope Concerns About LLC Project
Date: Thursday, August 11, 2022 3:23:09 PM

Sorry that I did not include your address on my first send.

Ms. Andrews

Please see my first email about my concerns about tonight's review of Resources LLC Proposed Plan.

I hope that my concerns will be included in tonight's review of the proposal.

Ms. Andrews

I own Parcel # 0222323077 which is somewhat down slope of the proposed project and I am concerned that the proposed plan will eventually damage my well and water supply over time.

Every year January thru March my property experiences surface and subsurface water coming directly from the property above mine which is next to the project.

I am very concerned that if the project's road surface affluents are concentrated into a single pipe, without a holding pond that is tested annually that my water will be affected. Especially concerning are the chemicals used in winter de-icing street and home chemicals and those used for washing and maintaining vehicles.
